Follower Enrollment (Track 2) 2019-2020

The Division of Academics is hereby notifying that the procedure of 'Follower Enrollment (Track 2) 2019-2020' has commenced.

The post-sophomore level (upper-level undergraduate and graduate) students intending to join the activities of Community of Physics, must follow track-2 procedures. In this track, followers will be enrolled in a course 'Contemporary Natural Philosophy CNP01/2020', which is a mandatory prerequisite for the course 'General Relativity in Brief (GRB01/2020)' offered by the Division of Experimentation.

Upper level undergraduate (Junior/Senior) and graduate (MS/PhD) students from Physics, Theoretical Physics, Applied Physics, Mathematics, Applied Mathematics, Chemistry, Electrical Engineering, and Mechanical Engineering are eligible to apply for this (Track 2) enrollment process. Current sophomore students, who expect to become junior students no later than April 2020, can also apply.

All applicants will be added to a *Google Classroom* and a *Hangout* chatroom. The question paper for the 'Track 2 Entrance Examination 2019-2020' will be uploaded in the Google Classroom. The applicants can solve it in a self-paced manner and upload to the Google Classroom within the deadline. Those who will achieve the required marks will be invited for a *Skype* interview. The students recommended by "Track 2 Follower Enrollment Committee" will then be offered followership by the Division of Academics.

In short, the CNP01/2020 course will start from January 05, 2020; and will be completed on June 16, 2020. Apart from classes in every Saturday, the course is comprised of two midterm examinations and a final.

Like all the other courses of Community of Physics, this course is completely free of charge. Those who are currently in their senior or master's levels and want to work in a research project are especially encouraged to apply.

Md Mohiuddin
